822 Heat and Air Expands Commercial HVAC Installation and Service Offerings

August 11, 2026

Benbrook, TX - August 11, 2026 -
822 Heat and Air, a heating and air conditioning contractor serving the Greater DFW Metroplex, has expanded its commercial HVAC installation and air conditioning repair services to meet growing demand across the region. The expansion strengthens the company's capacity to serve both large-scale commercial facilities and residential customers throughout communities including Benbrook, Crowley, Fort Worth, and surrounding suburbs.

The expanded offerings address the full range of heating and cooling needs, from routine maintenance and specific repairs to complete system replacements. For commercial clients, the company handles central air systems, rooftop units, split systems, ventilation solutions, ductwork design, heat pump systems, chiller systems, and building automation. Residential customers can access system installation, repair, ductwork services, and seasonal tune-ups designed to keep equipment operating efficiently through the cooling season.

The move reflects rising demand for reliable ac service benbrook tx property owners can depend on during the demanding Texas summer months, when air conditioning systems face extended periods of heavy use. Licensed and insured, 822 Heat and Air operates under Texas license number TACLA65080C and staffs its projects with certified technicians trained to handle each stage of an HVAC system's lifecycle.

David, a company representative for 822 Heat and Air, noted that the expansion responds directly to the needs of the surrounding communities. "Commercial and residential customers require different approaches, and the expanded services allow the team to address both with the same level of precision," David said. "The goal has always been to deliver systems that are reliable, efficient, and built to last, whether the project involves a single-family home or a large commercial facility."

The expansion also emphasizes energy efficiency, an area of growing importance for commercial building operators seeking to reduce operational costs. Demand for commercial HVAC benbrook businesses can rely on has increased as facility managers look for systems that balance comfort, productivity, and sustainability. The company reports that its installation process prioritizes energy-saving solutions intended to lower long-term costs while supporting a smaller environmental footprint.

David added that support does not end once a system is installed. "Comprehensive service means being available from the initial consultation through post-installation maintenance," he said. "That continuity helps commercial and residential clients protect their investment over the long term."

Beyond installation, the company provides ongoing commercial HVAC service, repair, and replacement, along with residential tune-ups and ductwork maintenance that promote consistent airflow and indoor comfort. The technicians conduct thorough inspections during maintenance visits, an approach the company says helps prevent unexpected breakdowns and extends the operational life of installed equipment.

822 Heat and Air is a professional HVAC company providing both commercial and residential services across service areas that include Crowley, Burleson, Benbrook, Granbury, Joshua, Godley, Cleburne, Alvarado, Fort Worth, Arlington, Dallas, and the broader Greater DFW Metroplex and suburbs. The company offers commercial HVAC, residential HVAC, ductwork, and AC tune-up services, and it makes financing available subject to credit approval and offer eligibility, with terms arranged directly between the customer and the chosen finance company.
